NEDEA 152 (1–3) 1–420 (1994) ISSN 0029-5493

Nuclear Engineering and Design

An International Journal devoted to the Thermal, Mechanical, Materials, and Structural Aspects of Nuclear Fission Energy

Affiliated with the European Nuclear Society (ENS) and with the International Association for Structural Mechanics in Reactor Technology, e.V. (IASMiRT)

Principal Editor: K. Kussmaul
Editors: T.B. Belytschko, R.T. Lahey, Jr., J. Poirier, H. Shibata, T.G. Theofanus

CONTENTS

Extended and Updated Selected Papers from the Joint IAEA/CSNI Specialists Meeting on Fracture Mechanics Verification by Large-Scale Testing, Oak Ridge, TN, USA, October 26–29, 1992

Preface, *K. Kussmaul* ix

Prediction of the first spinning cylinder test using continuum damage mechanics, *D.P.G. Lidbury, A.H. Sherry, B.A. Bilby, I.C. Howard, Z.H. Li and C. Eripret* 1

First spinning cylinder test analysis by using a local approach to fracture, *C. Eripret and G. Rousselier* 11

Comparative assessment of project FALSIRE—results, *J. Sievers and B.R. Bass* 19

Effect of biaxial loading on the fracture behaviour of a ferritic steel component, *D.J. Wright, J.K. Sharples, A.H. Sherry and L. Gardner* 39

Fracture mechanics and full scale pipe break testing for the Department of Energy's new production reactor-heavy water reactor, *A.B. Poole, J.A. Clinard, R.L. Battiste and W.R. Hendrich* 57

Regular Papers

NRC test results and operations experience provide insights for a new gate valve stem force correlation, *J.C. Watkins, R. Steele, Jr., K.G. DeWall, G.H. Weidenhamer and O.O. Rothberg* 67

continued on page 4 of cover

Announcement

Authors may accompany their manuscripts with texts in electronic form

Please see the notes on the inside back cover and the guide in the *Instructions to contributors* at the end of this issue. Authors are requested to submit a completed checklist with each diskette. Additional copies of the guide and the checklist are available from the publisher.

continued from page 1 of cover

Dynamic response of reactor internals to pipe breaks, *M.J. Jhung, K.B. Park, W.G. Hwang* 79
Loading of tubular filters in AGR, *F.P. Berger and A. Ijaz* 91
Rocking response of tanks containing two liquids, *Y. Tang* 103
Two methods for seismic analysis of non-classically damped systems, *A.K. Gupta and H.A. Megahed* 117
A comparative study of anisotropic creep theories, *M. Kawai* 121
Alternating method applied to analyse Mode-III fracture problems with multiple cracks in an infinite domain, *K. Ting, C.-S. Chang and K.-K. Chang* 135
Protection against missiles due to a failing PWR pressure vessel, *B. Göller* 147
Intersystem LOCA risk assessment: methodology and results, *W.J. Galyean, D.L. Kelly, J.A. Schroeder, J.L. Auflick, H.S. Blackman, D.I. Gertman and L.N. Hanley* 159
Second trip system for NRU research reactor, *C.M. Tseng* 175
Evaluation of core thermal and hydraulic characteristics of HTTR, *S. Maruyama, N. Fujimoto, Y. Sudo, T. Murakami and S. Fujii* 183
Determination of the minimal number and optimal sensor location in a nuclear system with fixed incore detectors, *D.Y. Oh and H.C. No* 197
A bubble number density constitutive equation, *G. Guido-Lavalle, P. Carrica, A. Clausse and M.K. Qazi* 213
Void fraction along a vertical heated rod bundle under flow stagnation conditions, *M.K. Qazi, G. Guido-Lavalle and A. Clausse* 225
Numerical method for analysis of turbulent liquid metal magnetohydrodynamic flow, *H. Araseki and S. Kotake* 231
Measurement of interfacial area concentration in subcooled liquid–vapour flow, *O. Zeitoun, M. Shoukri and V. Chatoorgoon* 243
The effect of a plate axial to the flow on the liquid distribution in annular two-phase flow, *B.J. Azzopardi* 257
Transient behavior of natural circulation for boiling two-phase flow (flow after pump trip), *J.-H. Chiang, M. Aritomi and M. Mori* 263
Flooding in a thin rectangular slit geometry representative of ATR fuel assembly side-plate flow channels, *T.K. Larson, C.H. Oh and J.C. Chapman* 277
MELCOR sensitivity studies for a low-pressure, short-term station blackout at the Peach Bottom plant, *J.J. Carbajo* 287
A natural convection model of molten pool penetration into a melting miscible substrate, *M. Epstein* 319
Scaling laws for single-phase natural circulation loops, *P.K. Vijayan and H. Austregesilo* 331
Non-linear analysis for a natural circulation boiling channel, *Y.N. Lin and C. Pan* 349
Stability analysis of a liquid-metal reactor and its primary heat transport system, *E.V. Depiante* 361
Countercurrent flow limitation in inclined channels with bends, *S.M. Ghiaasiaan, R.E. Turk and S.I. Abdel-Khalik* 379

Technical Engineering Note

The system for transportation and handling of radioactive waste packages in the planned Konrad repository, *H.P. Berg and K. Harnack* 389
